Satellite Dish/Cable Authorization Form

This form must be given to the dish/cable installer prior to beginning installation.

Can the satellite dish be mounted on the building siding? Yes No

Can the satellite dish be mounted on the overhang of the roof, in the rear only? Yes No

Can a ground-mounted pole be installed if necessary for reception? Yes No

Satellite dish size does not exceed FCC Regulations. Yes No

Installation can take place within the resident's private area, such as deck or balcony. Yes No

Can the installation occur on common areas if necessary for the installation? Yes No

Wires on the building must be securely attached and may not be run up and down or across the central area of a building surface. Instead, wires must be camouflaged by routing them along the bottom of the siding, a siding lap edge, along the soffit or fascia, along edges of a corner board or behind a downspout, so as to camouflage or hide such wiring to the maximum extent possible.

Yes No

Allow drilling for the wire to enter the building. Yes No

Telephone/cable wire is to be buried before approval. Yes No

Exterior/ground wires must be buried before approval. Yes No

Comments: _____

Owner's Name Address Phone Number
